

Computer Science 2 Project	Team Members:	Rayen Leigh C. Elecho
Group Progress Report		Jerriel Aljamz Salih
3rd Quarter		
Week 4 - Feb 6, 2026 (covers week 6)		
GOAL State your goal for the Week	DATA COLLECTED State/list the data collected relevant to your project	PROGRESS State the progress you have made so far by the end of the week
To finish improving the user interface of the "Add Assignment" feature for better usability	N.A.	By the end of the week, the "Add Assignment" feature was redesigned with a cleaner and more user-friendly interface using a popup form with clear input fields and buttons. We also implemented and refined several core features including editing and updating assignments, deleting assignments with confirmation prompts, marking assignments as completed, tracking assignment status, priority levels, automatic deadline sorting, and filtering and search functions. These updates improved both the functionality and overall user experience of the application.
To finish implementing and refining core assignment management features such as editing, deleting, and marking tasks as completed.		
STRENGTH		
The application now has a clean, organized, and intuitive layout. Features are easy to understand and use, and the improved UI makes task management more efficient and less cluttered.		
AREAS FOR DEVELOPMENT		
The app still needs further testing, polishing of visual feedback such as reminders and alerts, and optimization of how features work together during heavy use.		
STRATEGY FOR SUCCESS		
We will continue testing the application, fixing bugs, and refining features such as reminders and overdue alerts. Feedback from classmates will be used to further improve usability and performance.
